## SKILLS

- Project Management
- Crypto
- Blockchain Dev
- JavaScript
- C# (.NET)
- Effective Communication
- Critical Thinking
- Digital Marketing

## LANGUAGES

- English (Fluent)
- Hindi (Fluent)

## PROFILE

Motivated and self-taught 15-year-old backend developer with a strong passion for building real-world, high-performance software tools. Specialized in C# (.NET) and JavaScript (Node.js), with hands-on experience in blockchain integrations, automation systems, and desktop application development. Proven ability to develop and deploy tools such as crypto wallet utilities, memecoin sniper bots, candle prediction software, and smart contract interaction platforms. Continuously learning and adapting, with additional experience in Android (Java), TypeScript, and various crypto APIs (Solana, Tron, Ethereum). Eager to grow through remote internships, open-source collaboration, or freelance tech opportunities.

## WORK EXPERIENCE

- Freelance Backend Developer
- Remote | 2022 - Present
- Built over 10+ real-world tools focused on crypto, automation, and backend logic
- Developed custom software like TRC-20 USDT Sender, ETH/BTC recovery tools, and Solana memecoin sniper bots
- Created GUI-based apps using C# (WPF) and backend systems with Node.js
- Integrated APIs: Tenderly, Binance, Alchemy, Solana RPC, Ethermine, and Telegram Bot API

## EDUCATION

High School Student  
India | 2022 - Present

- Actively pursuing academics while self-learning software development
- Special focus on backend development, blockchain tech, and automation tools
- Built real-world projects alongside studies, including crypto bots, trading software, and mining tools
- Continuously learning advanced topics through documentation, experimentation, and building
